

## **Teton Viewer Installation Instructions**

### **WINDOWS CD-ROM / DVD-ROM**

1. Load disc (Disc 1 if 2-disc set). The STAT!Ref Disc Browser will activate. If the STAT!Ref Disc Browser does not activate automatically, you can manually launch it by locating and running the demo32.exe program on the disc.
2. Once you have launched and explored the STAT!Ref Disc Browser, click on the Install link in the left frame. On the Installation page, choose the appropriate option and click the Install Now button to start the software installer.
3. Follow the instructions on the screen.

### **For Medical Reference and STAT!Ref Library CD-ROM Users ONLY**

Note: These products are 2-disc sets that copy the libraries and image files to your hard drive automatically. For proper display of images, it is necessary that the image directory reside in the same location as the libraries.

- For Medical Reference and STAT!Ref Library CD-ROM users ONLY, please eject all discs from the drive before running Teton Viewer.
- All products may launch Teton Viewer from the Start | Programs menu.

### **Mac OS CD-ROM / DVD-ROM**

1. Load disc (Disc 1 if 2-disc set). Double-click the icon that appears on the desktop.
2. Double-click the STAT!Ref Installer icon.
3. Follow the instructions on the screen.

### **For Medical Reference and STAT!Ref Library CD-ROM Users ONLY, this additional step is required:**

Note: These products are 2-disc sets that copy the libraries and image directories to your hard drive automatically. The image directory must remain in the same location as the library file.

- Please eject all discs from the drive before running Teton Viewer.
- Launch Teton Viewer either from the new icon on the desktop, or from the Apple Menu.

## **Configuring and Running Teton Viewer Libraries**

1. Personalize your copy of the software by entering your name and organization when prompted. Click OK.
2. Trial Users: Click Trial in the Open Library window.  
Subscribers: The library that you just installed should appear in the drop-down Library Menu in the Open Library window. If your library does not appear in the Library Menu, click Scan to add it to the list or click Other to browse to the location of the library (\*.fx) file. Enter your Registration Number and Key Code then click OK.
3. Click OK when you are finished referencing the What's New window. Click Close when you are finished referencing the Helpful Hints window.
4. Your library should now be open to the main Search screen, and ready for use.

**Network installations should consult the manual on their disc. Intranet installations should call for more complete instructions.**

### **Additional Teton Viewer Instructions**

If you have more than one STAT!Ref product, you should perform a separate installation for each of your additional discs to ensure that each product is configured properly on your system. The instructions below will explain how to switch between your STAT!Ref libraries.

### **Switching Between STAT!Ref Libraries and Discs**

Once you have installed all of your libraries and opened them for the first time with the steps above, you can easily switch between libraries by selecting the library you want to open from the Library List at the bottom of the File Menu. If the library resides on a separate disc, you are prompted to insert the appropriate disc.
