Overview:

Written and published by pharmacists and reviewed by over 500 experts, *AHFS DI* is the most comprehensive evidence-based source of drug information complete with therapeutic guidelines and off-label uses. The only compendium designated by the US Congress, *AHFS DI* is also the only reference published by a non-profit scientific association--ensuring it is the most authoritative and best-selling reference trusted by pharmacists for more than 50 years. Its detailed and comprehensive drug monographs deliver valuable information and therapeutic guidelines to even the most complex questions. Don't waste time searching other references when you know you will always find the answer you can trust to be accurate inside – everytime.

You can trust *AHFS DI* – It's the only drug information reference on the market today that is published by a non-profit scientific society and peer reviewed by over 500 experts in the healthcare field.

AHFS references are evidence-based and peer-reviewed, compiled without the influence of manufacturers, insurers, regulators or other interested parties. No other drug information sources can make this claim.

The 2010 edition has been updated extensively, incorporating revised information on uses, therapeutic perspectives, cautions, drug interactions, new products and other new developments. Each year more than 60% of the monographs are revised. In addition, the coverage in the 2010 edition has been expanded by 51 new drug monographs.
