

ACP PIER, Journal Club & AHFS DI® Essentials™

© 2007 American College of Physicians,
American Society of Health-System Pharmacists

Editor: American College of Physicians (ACP)

ISBN: n/a

Subjects: Internal Medicine, Point-Of-Care,
Evidence-Based Medicine

Overview:

A pre-appraised, evidence-based clinical tool that defines the standard of care, including value-added abstracts of original journal articles and drug treatment information.

PIER (Physicians' Information and Education Resource)

• Integrated and authoritative EBM resources for the point-of-care and background reference.

- Links in PIER's disease modules take users to supporting articles in ACPJC.
- Updated Monthly
- Combined with AHFS Essentials, the drug resource that provides quick access to dosage, interaction and other pharmacy information.

ACP Journal Club

- ACP Journal Club is the quintessential EBM journal that summarizes original research applicable to clinical cases.
- Over 100 journals are reviewed for implications on therapeutics, diagnosis, prognosis and etiology.
- McMaster Online Rating of Evidence (MORE) gathers ratings of new articles, already assessed for scientific merit, from sentinel readers (a panel of 2000+ physicians from around the world).

AHFS DI® Essentials™

Distills the essential information from the larger AHFS Drug Information database.

This title updates monthly.

NOTABLE

PIER Voted #1 EBM point-of-care tool!

The study "Systematic Evaluation for Evidence-Based Medicine Tools for Point-of-Care", rated PIER

highest in all four categories:

General Information,
Content,
Searching Ability,
and Results.

The evaluation compared PIER to 13 other major evidence-based resources.
