

Evidence-Based Geriatric Nursing Protocols for Best Practice

3rd Ed. © 2008 Springer Publishing

Editors: Elizabeth Capezuti, PhD, RN, FAAN;
DeAnne Zwicker, MS, APRN, BC;

Mathy Mezey, EdD, RN, FAAN; Terry T. Fulmer,
PhD, RN, FAAN; Deanna Gray-Miceli, DNSc, APRN;
Malvina Kluger

ISBN: 0826111033 / 9780826111036

Subjects: Nursing, Geriatrics

Overview:

This e-book addresses clinical problems, syndromes or diseases that older adults commonly experience and a distillation of what constitutes "best practices" to deal with them. A Doody's "5-star" selection and Essential Purchase Title, it includes 17 revised and updated chapters and nearly 20 new topics including critical care, diabetes, hydration, oral health care, palliative care and substance abuse. A uniform process ensures that the information is evidence-based while each chapter includes educational objectives, assessment of the problem, nursing care strategies and references. Also features a variety of case studies.

RATINGS & REVIEWS

Doody's

- Doody's Core Title
- Essential Purchase Title
- Star Rating: ★★★★★

QUOTED

"As a gerontological clinical educator/research nurse, I will often use this as a reference. The format and the content are good, and the explanations of how to best use the evidence simplify the process of sifting through mountains of information to figure the best practice."

JDonna Minner, BSN, RN (University of Missouri-Columbia)
