

## STAT!Ref Resources for the ICD Transition

Ensure a smooth and easy transition to ICD-10 with the comprehensive and unique tools now offered by STAT!Ref.

### STAT!Ref ICD Coding Resources

The following resources are cross-searchable within the STAT!Ref platform and can be purchased ideally in combination with special package pricing or a la carte based on your institution's specific needs. Click each resource cover to learn more.

### New ICD Conversion Tools

STAT!Ref is the only place to find both the ICD-CM and ICD-PCS Conversion Tools. ICD-9 was expanded from 17,000 to approximately 141,000 ICD-10 codes, but STAT!Ref shortens the process of checking codes for accuracy with these convenient cross-referencing tools. Simple and straightforward panels on your STAT!Ref subscription interface allow users to enter in an ICD-9-CM or ICD-9-PCS code and get a pop-up panel containing the ICD-10-CM or ICD-10-PCS equivalent. Or, simply get the reverse functionality at the click of a button. These extremely valuable panels are available FREE to those who purchase both ICD-10-CM or ICD-10-PCS.

ICD Procedure Codes	ICD Diagnosis Codes
